EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Wilford on 06 April 2009.

The application has been amended as follows: Replace the abstract with the following:

A digital image in CMOS camera images is processed by first generating an output signal g from a CMOS camera. Then its spatio-temporal gradient (g_x, g_y, g_t) is derived from the output signal. A time constant c and a local object shift (u_x, u_y) are established from prior knowledge. Finally a target signal value q is calculated from the output signal g as

$$q = (g_x * u_x) + (g_y * u_y) + (g * -1 * c) + g_t.$$
